This will be a virtual
seminar.

NJBOA is pleased to announce
that we will be hosting an
online 5-hour seminar entitled,
"When Disaster Strikes" on
Thursday June 8, 2023,
beginning at 8:30am. This
seminar will be presented by the
International Code Council, and
is approved for .5 CEU's by the
NJDCA.

All too often before and after a
disaster, an affected community
is left on its own to struggle
with preparing to respond to the
event and then assessing and
dealing with its damage. When
assessments are not conducted
quickly, a community's
residents will reoccupy
potentially unsafe structures.
Small scale localized events can
often be handled by local

building departments. However, in a large scale and/or large regional disaster, local building departments are unable to meet the demand and often unable to provide these valuable assessments.

The ICC Disaster Response Inspector Program is aimed at training and certifying qualified professionals to assist with performing Post-Disaster Building Safety Evaluations. It also discusses the NIMS credentialing process whereby properly trained and qualified Post-Disaster Building Safety Evaluators can be prequalified and rostered. By properly training and pre-qualifying a pool of individuals building officials are better able to jump start recovery.

Course Objectives...

- Discuss Various types of disasters and their impact on a community.
- Demonstrate how to employ Disaster Planning Basics.
- Explain the roles and duties of the Post-Disaster Building Safety Evaluator.
- Discuss the ATC 20/45 Rapid and Detailed Building Safety Evaluations.
- Identify various structure types.
- Identify disaster-related damage to the various structure types.

Pre-registration is required through Eventbrite by following this link:
