

Dear ICC Chapter Presidents,

I hope this email finds you well. The International Code Council is seeking valuable insights from permit technicians, building and fire officials, and plans examiners to support the development of resources that will enhance the permitting, plans examination, and inspection of hydrogen systems.

To assist in this effort, we kindly ask for your help in sharing the **Hydrogen Permitting and Safety Survey** with your chapter members. **Whether or not you have previous experience with hydrogen projects, your insights are vital to improving permitting, plan review, and inspection processes for hydrogen deployment.** This survey, conducted under a U.S.

Department of Energy initiative, aims to identify challenges and resource needs related to hydrogen deployment. By participating, respondents will help shape solutions to streamline permitting processes and ensure safety in future hydrogen projects.

As a token of appreciation, participants will have the opportunity to enter a drawing for a chance to win one of 25 \$100 gift cards.

Link to Survey: <https://www.surveymonkey.com/r/hydrogensafety>

We greatly appreciate your support in spreading the word about this important initiative. Please let me know if you have any questions or need additional information.

\*This material is based upon work supported by the U.S. Department of Energy's Office of Energy Efficiency and Renewable Energy under the Hydrogen and Fuel Cell Technologies Office award Number DE-EE0011532.

Best regards,

Mark Fasel
